3. Distance Learning Environment Update

We have two dedicated class rooms that can accommodate 30 participants in Center for Information Technology and 40 participants in GDLN. We have two high end video

conferencing systems (Polycom) including some others supporting equipments such as video camera, audio mixer, etc.

WASABI Web Development Workshop

4. Technical Update

Since 2012 our campus have internet speed connection are 200 Mbps and we dedicated 1 Mbps for video conference connection.

5. Network Update

No update.

6. National Research and Education Network (NREN) update

Indonesia NREN INHERENT is back to not active since Januari 2012. Connection between site varies between 1Gbps between big cities and 32 Mbps for medium cities. East Indonesia especially in Unhas is still connected via 2 Mbps satellite link.

7. Your organization's role in NREN

Unhas is connected to INHERENT, and GDLN Asia Pasific.

8. Lecture attending situation

The participants who joined the lecture depend on the topic offered. And we invite not only the students of Unhas but also the students and other stakeholders from outside campus (like NGO) to join in as long as the topic related to their field.

9. Ideas: how to make student more active to join the class?

We have announced the class through official website of GDLN when there's event coming up. We also publish the event on Mailing list, social media, and we contact directly the lecturer who has a background knowledge in the offered topic. We also give a certificate to participants.

10. Research and Development in Network, including applications

We have established VPN connection to KIC for conducting cloud computing related research (live migration of VM). So far, there is no significant progress.

11. Will your organization to be host next AI3-SOI-Asia bi-annual meeting?

Fall 2015
